

VFF

Tank Bottom Butterfly Valve

Tank bottom butterfly valve in stainless steel is designed to meet sanitary processing system requirements, acting as ON/OFF valve and available in manual or pneumatic operated versions. Composed of one head, a welding plate and a shutter disk enclosed in a seal gasket. Thanks to their internal design and the wide bore, they guarantee a gentle treatment of the product flow, a minimization of turbulence, contamination and a low pressure drop. The seal gasket is conceived to be flush to the internal passage, avoiding product entrapment.

ADVANTAGES:

- ✓ Hygienic design
- ✓ Low pressure drop and minimization of turbulence
- ✓ Easy to automate pneumatically
- ✓ Wide range of applications
- ✓ Simple and fast maintenance
- ✓ Certified materials for Pharmaceutical use
- ✓ Full traceability

APPLICATION:

Designed for meeting the requirements of the plants in the Pharmaceutical, Food & Beverage, Cosmetics, Dairy, Fine Chemicals industries.

The hygienic design is completed by the heads assembled by means of hidden screws and the internal and external surface finishing.

Size range	From 1" up to 4"
End connections	Tri-Clamp or butt weld dimensionally according to ASME BPE
Stainless steel in contact parts Material	AISI 316L - 1.4404
Seal Material	SILICONE [standard] - EPDM [till 2" included] - FKM
Internal surface finish	Ra ≤ 0.5µm
Working pressure rating	From 1" to 4" Vacuum ÷ 10 barg
Working temperature rating	0°C ÷ 150°C [Only for sterilization or short time]
Certifications	3.1 material certificates (in contact) according to UNI EN 10204 FDA USP Class VI ATEX other certificates on request

*For actuators and optional see page 3
